CYFERD

Scouting App Project

From fragmented scouting to an integrated, flexible workflow.
Reduce risk, save time, and build a stronger squad — all in one place.

General Information

Context
Modern clubs need an integrated *Scouting App* that covers the *full process*, from understanding club identity to the final signing.
This covers my full blueprint, 8+ years of tested files, and ongoing feedback so Cyferd stays ahead of real club needs.

Goal of a Scouting Department
Be always ready to present players for the first team taking in count financial viability, opportunities in the market, Roste r Awareness, and Physically adaptable to us and the league.

Mission
Full Universe ➜ Data ➜ Subjective ➜ Algorithm ➜ Shortlist
<u>Push Clubs to move from static spreadsheets to a dynamic, club-tailored workspace — live, flexible, trusted</u>

Example Files

Scouting Blueprint

CYFERD SPORTS

Club Methodology & Game Style

First, it's important to understand the club's methodology and playing style to guide a successful scouting process. This should be defined by the Technical Director, considering the club's organizational culture, identity, and core values.

Season Review & TD Alignment

- ✓ Chief Scout, Technical Director & Coaching Staff align before the window.
- ✓ Collective Data (performance stats)
- ✓ Subjective match reports (coach insights)
- ✓ Sports Science Opinions (injuries, workloads, nutrition trends)
- ✓ Output: Clear presentation with key positions & target player attributes.
- ✓ Sets the base for the final Scouting Plan.

Chief Scout Role

- Maintain live scouting lists & target updates.
- Receive player pitches via Transfer Room & agents.
- Prioritize key tournaments to spot new gems.
- Collect monthly scout reports with ratings & comments.
- Merge subjective scout views with Big Data & Physical Data.
- Check player viability: agent, club, transfer fees, expected salary.
- Final output: Ranked shortlist ready for negotiation.

Final Shortlist & Next Steps

Once a final shortlist and player reports are complete, negotiations can begin. It's common to hold Zoom calls with players or even visit them in their cities — this adds valuable final context on attitude, confidence, and social skills, which feeds back into the player report.

At this point, the Sporting Director should always compare all available profiles, supported by clear attribute scores, league benchmarks, and expected performance levels — ensuring every signing is justified with both objective and subjective evidence.

Phase 1: What to look for?

CYFERD SPORTS

CLUB METHODOLOGY

SQUAD SUCCESSION PLAN

SEASON OVERVIEW

SPORTING DIRECTOR ALIGNMENT

Club Methodology

Clubs have unique philosophies:

- Are they *selling clubs* focused on developing young players for resale?
- Are they *performance-first* clubs, prioritizing immediate success?
- Do they have a multi-club structure ?
- Mechanism in the game model, usually behaviors Example: Reaction when loosing the ball.

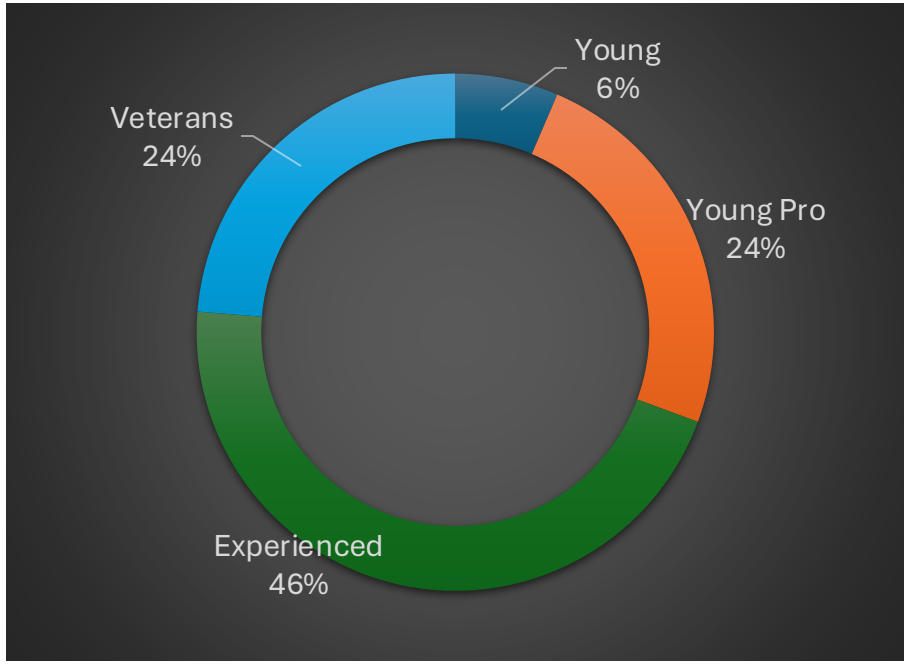
Game style

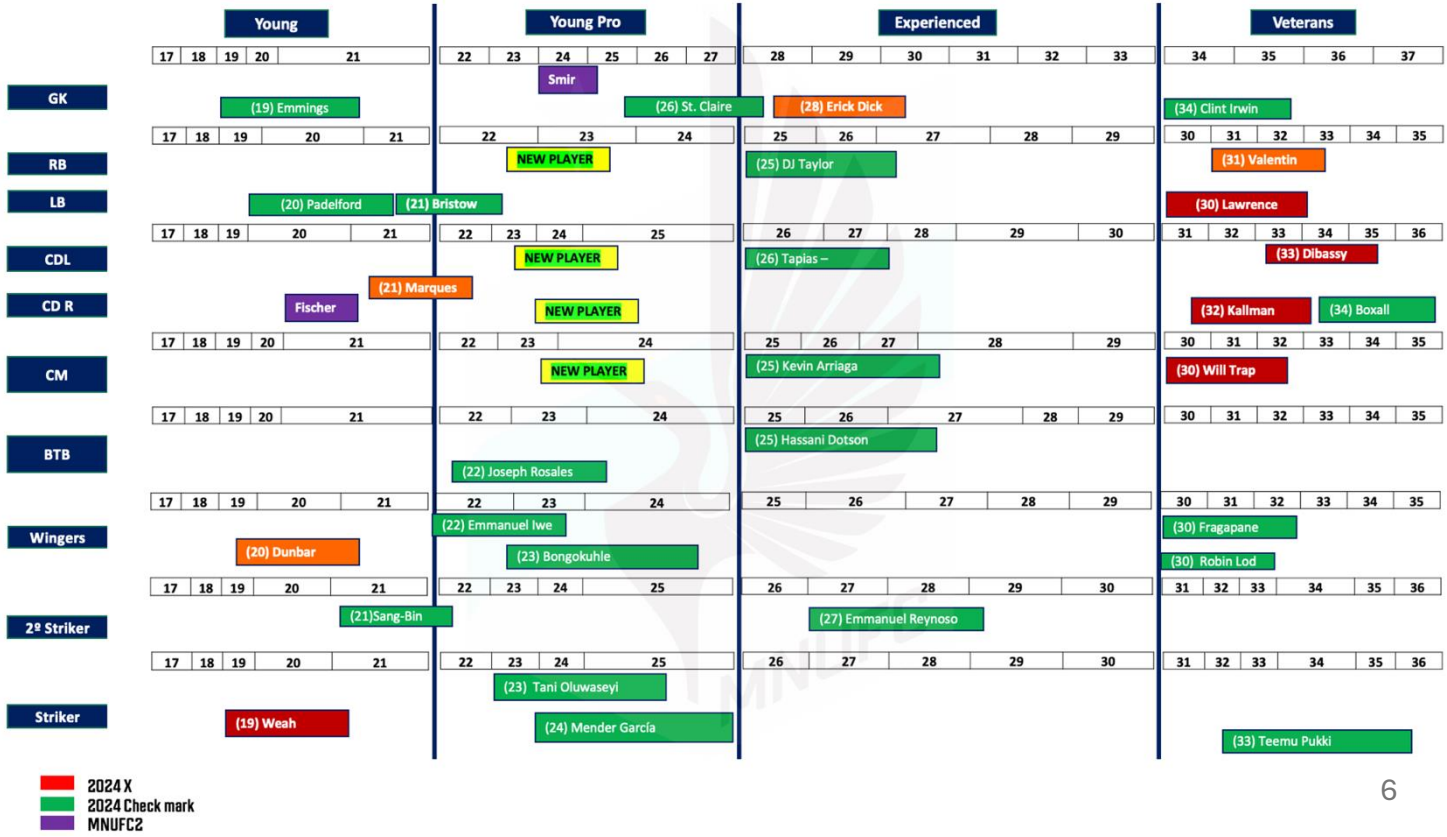
Defensive Phase	Ability to defend high. Possibility of applying pressure for long periods. Potential to defend with guarantees (risk zone). Delay receiving second line support. Win individual duels.
Attacking Phase	Dynamism (use of space). Mobility and attack variants, generating free spaces. Constantly delivering crosses. Winger adapt and inside the box.
Resume of Game	Passes between the lines from the center backs to the inside players, changes of direction and third man.
Pressing	Measure a quick transition from the opponent. Recover the ball as quickly as possible. High and intense pressure.
Set Pieces	On defense: mixed marking. Aristeguieta always at the near post. Blocking. Deception.

Squad Succession Plan

Squad Age & Contract Management
A 'Squad Ladder' file gives a panoramic view of your roster: contract expiry, age distribution, positional depth. This is a must in terms of planification. Important to be aware of the **league rules** as now is popular to vet international spots or limit them.

Shows squad balance: where you have experienced, veteran, or young players.
Example: If you lose a 30-year-old striker, do you replace him with a veteran or introduce a promising 24-year-old for better balance?
Benchmark: Based on analysis of 100 champion squads across 30+ leagues to define ideal age ranges per position.
Outcome: Better succession planning and healthy squad dynamics.



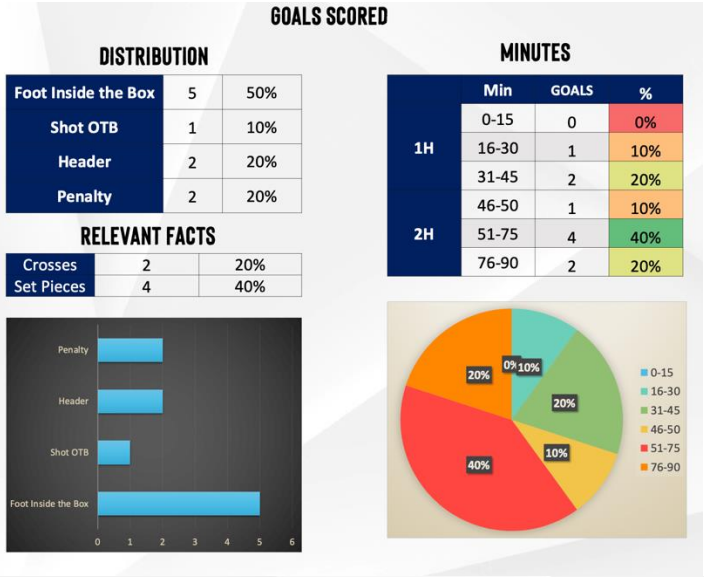


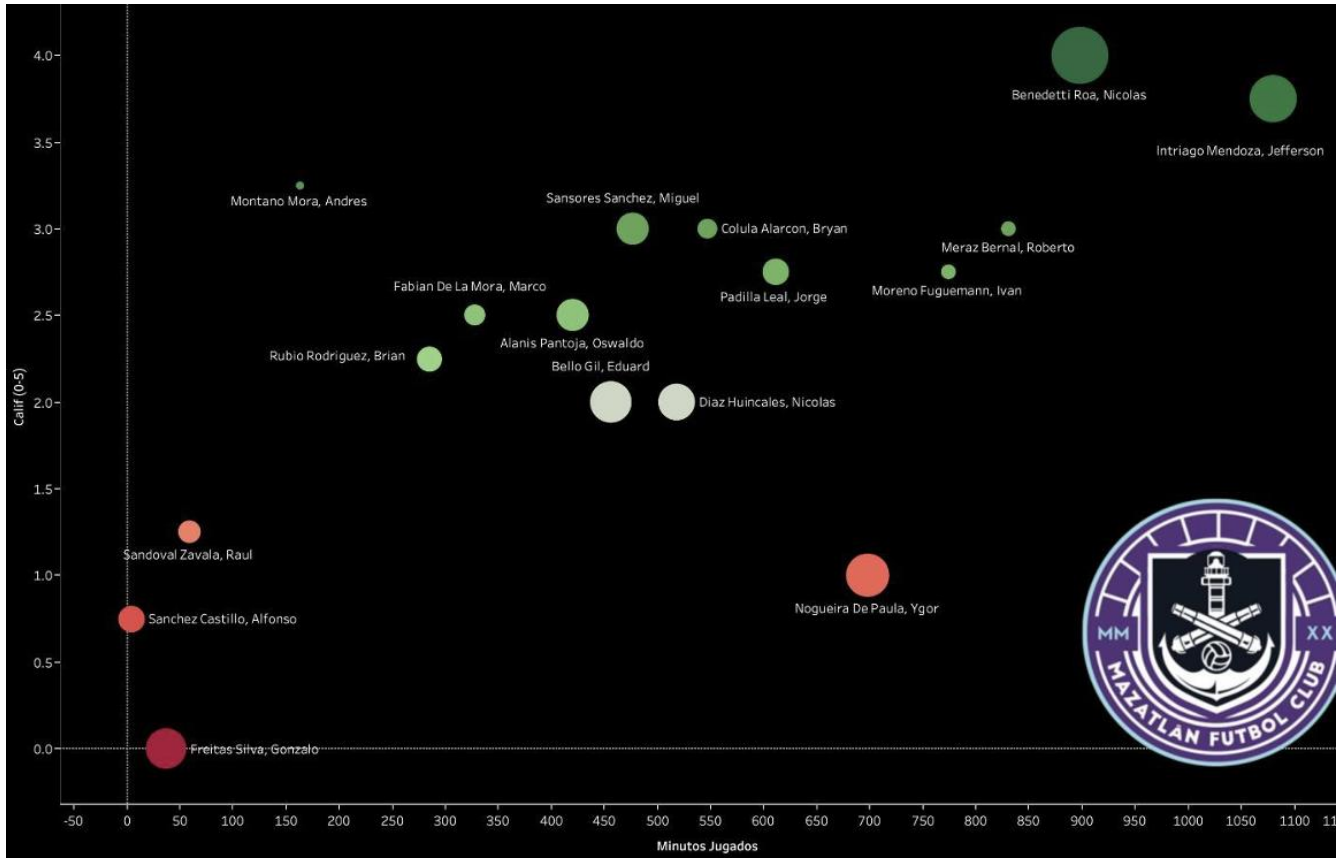
Season Overview

Key Action: Hold an end-of-season meeting with Sporting Director & Coaches.

- Review **collective** and **positional** performance data.
- Example insights: low crossing volume, defensive fragility, high injury rates. Season Overview Examples

Output: Define *positions needed* and *attributes required* — no names yet just define positions and **ideal attributes**.





Sporting Director Allignment

Player Profile - Setting Structure

Inspired by Seirulo's structured training approach, top clubs like FC Barcelona define not only technical parameters but also the *conditions* that shape a player's full profile. There are eight key structures — conditional, cognitive, emotional-volitional, coordinative, bioenergetic, socio-affective, expressive-creative, and mental — and each player develops these differently. This holistic view helps align the player profile with what the club demands on the pitch and in the environment. It should be guided by the Technical Director, who adapts it to the club's vision, style, and identity. **Define slots:** Domestic, U21, Foreign — align with league limits.

Coordinative

Body orientation. Balance. Rhythm. Differentiation. Spatial-temporal structure. Reaction.

Mental

Concentration. Confidence. Motivation. Emotional control. Discipline. Resilience.

Creative-Expressive

Ante situaciones bajó presión, solucionan. En contrar recursos con poco espacio. Incertidumbre – Solución.

Cognitive

Anticipation. Decision making – Perception. Tactical understanding. Spatial awareness.

Bioenergetic

Biological and physiological efficiency based on the sport's energy requirements.

Socioaffective

Assertiveness level – High motor skills. Ability to transmit and receive information.

Conditional

Strength. Speed. Endurance Flexibility.
Qualitative dimension.

Emotive-Volitional

High motor skills. Ability to transmit and receive information..

For reference : Seirullo Player Conditions Model

Sporting Director Allignment

CYFERD SPORTS

Attributes

Bridge the gap between *methodology* and *data-driven scouting*:

Example: "Striker that holds up the ball" → Track *ball retention* stats.

Best practices:

- Averages per 90 vs. Totals
- Adjust for league strength
- Contextualize stats (coaching style, match situation)
- Weight performance based on match difficulty and pressure
- Teams playing same Game style will have more probability to adapt.
- Building a Score per position.

"**Dynamic midfielder** and **full of energy**, someone that can **go box to box (1)(2)**. Timing of **runs into the box (3)** when the balls wide. Characterized by their **physicality** and **direct runs (4). On the ball they should be capable of delivering in key moments (5).**"

KEY SELECTION ATTRIBUTES

Physical

1. HI Meters Per Minute TIP
2. HI Meters Per Minute OTIP

Game Intelligence

3. Cross Receiver Run Ratio
4. Runs In Behind & Ahead Ratio
5. Dangerous Pass Attempts P30 TIP

GOALKEEPER

- Commanding voice. Strong personality. Leader. Bravery.
- Defense org, giving stability to the line.
- WTB: Good controls with both feet. Playing simple. Can work under pressure.
- Strong in cutting crosses, and dominant in the air.

CENTRAL BACKS

- WOTB: 1V1 Winner, dominant in Defensive Duels and showing Aggressiveness, Man on Man Mark, Game Reading, Cover Depths. Defensive habits: Tackles, Dropping, Recoveries and Shifting.
- WTB: Capable of sending long ball, Finding 3rd man, Breaking Pressure.
- Able to over come, RESILENCE and Calm under pressure. Leader!
- Dominant in the Air Duels.

WINGERS

- Productive in crosses and shots on goal, important to not being predictable. Set Pieces Execution.
- Winning duels or fouls received. Dribbling. Wriggle out of pressure.
- WOTB: Making runs to be an option, prevent offside. Cross Receiver!
- Able to play both wings is preferable.
- Communication with Fullback & Willingness to defend,. Closing passing lines.

FULL BACKS

- WTB: Good delivery service in final third. Create chances. Can dribble to open spaces and brake pressure.
- WOTB: Sinergy with winger, Defending crosses, Orientation, Reading the game, Competitive ground duels, positionally defending cross opposite site .

CENTRAL MIDFILDIERS

- WTB: Pass completion, Receive under pressure, Ball control, Weak foot, Long ball, Ball progression, Drive the ball. Composure!
- WTOB: Great positional understanding, good body orientation, scanning to read spaces and free man. Provide defensive balance. Second ball winner. Able to predict and anticipate scenarios, commanding and communication.
- Creative to open spaces (Cognitive skill).

STRIKERS

- WTB: Receiving and able to keep possession (Retention). Dribble.
- Create chances by his own (Dribble, long shots). Good Header.
- WOTB: Off ball runs: Dropping, Coming short, In Behind.
- Composure in the box. Calm in the storm.
- Tenacious, Tricky, Shrewd in the box.

- **WTB=With the ball WOTB= Without the ball**

CENTRAL FORWARD

- ATTRIBUTES
  - ✓ PROVEN GOAL SCORING RECORD
  - ✓ INTELLIGENT MOVEMENT IN THE BOX
  - ✓ PACE TO GET BEHIND THE DEFENDERS
  - ✓ WORK RATE, FIRST LINE OF DEFENSE
  - ✓ TECHNICALLY RELIABLE
  - ✓ GOOD IN THE AIR

METRIC	%
XG	10%
Score	20%
Shots on goal /90	15%
Touches In Opponent Box	20%
% Ball Retention - Percentage of the time you have possession of the ball and don't end up losing it.	10%
Individual Pressure - Metric that measures the number of successful efforts (possessions recovered) made by a player when pressing the opponent.	7.50%
% Aerial Duels	7.50%
%HSR	10%

The best way to use Big Data in Scouting is to add the context to it, you can have algorythms and formulas but Data can always be a Byas, that's where the challenge is.

Phase 2: Analysis

CYFERD SPORTS

DATA ANALYSIS

PLATFORM BENCHMARK

PLAYER REPORT

Data Analysis

CYFERD SPORTS

Big Data is now accessible to most clubs. Some tools are free, while others cost up to $200,000 USD per year, often with restrictions on leagues, reports, or account numbers. We can divide how clubs use data into two main dimensions:

Collective vs. Individual Data
Some platforms deliver team-wide performance data; others focus on individual attributes. Many clubs now work with data providers to generate scores and build player lists accordingly.

Two Types of Clubs

Data-Centric Clubs: These have full analytics departments connected to APIs, pulling raw data and building in-house dashboards. They often focus on raw totals (not just per 90 stats) and build customized rankings

Technical-Led Clubs: These have a Chief Scout or TD working with one analyst who interprets reports. This model relies more on qualitative filters and real-world validation (e.g., coaching insight).

Despite different setups, most clubs have the same goal: reduce risk and make smarter signings. What's lacking, however, is **future-focused insight**. Very few platforms offer predictive tools. Most data stops at describing the *now*, not forecasting the *next*.

Key Observations:
Clubs looking for consistency break the season into blocks (e.g., 8 games) to assess performance over time.
Some restrict recruitment by nationality — believing too many players from the same country can reduce dressing room integration.
Similarity tools (based on technical stats, heat maps, and profiles) are currently the most used predictive element — clubs often ask "Who plays like Player X?"

Most Popular Metrics Today

Expected Goals (xG): The probability that a specific shot will result in a goal, based on factors like shot location and angle.

Running Behind

Goals Added: total value of all on-ball actions (passes, dribbles, carries, tackles, etc.)

Passing Packed: forward-passing value, depth, and risk.

Club Score: weighted attributes per position built per club's needs.

% Crossing: Successful crossing.

1 V1 Duels Won: Attacking and Defending

Platforms Benchmark

CYFERD SPORTS

In today's market, clubs can choose the right mix of **Big Data**, **Physical & Game IQ**, **Regional/Emerging**, and **Admin & Transfer Tools**, depending on their strategy and budget.

Big Data: deal for clubs that want advanced tactical metrics, detailed breakdowns, and API integration to power in-house models.
Physical & Game IQ: Best for clubs that care about in-game player movements, runs, and tactical detail — premium but powerful.
Regional / Emerging: Valuable for scouting areas under-covered by mainstream data tools — especially Africa or smaller domestic leagues.
Admin & Transfer Tools: Platforms like **Transfer Room** and **Libro de Pases** keep transfer intel up-to-date, build trust between clubs.

Category	Provider	Origin	Strengths & Notes
Big Data / API Providers	Impect	Germany	Detailed passing models; very strong for build-up phase analysis.
	StatsBomb	UK	Renowned for 'On-Ball Value'; collects proprietary data; trusted by top clubs.
	Opta	UK	Veteran provider; reliable, broad stats like third assists, defensive actions.
	Driblab	Spain	Flexible: platform or API; works well for clubs with no in-house coding; used by Inter Miami.
	American Soccer Analysis	USA	Known for their Goals added (g+) measures a player's total on-ball contribution in attack and defense
	SciSports	Netherlands	Good for budget-conscious clubs; not as deep as leaders but solid.
	FBREF	Global/Spain	Free public site with a wide range of stats; good for baseline research and quick checks.
	Be Soccer Pro	Spain	Interesting algorithms that generate useful stats — the most popular "ELO" rating that combines match difficulty, opponent strength, competition level, etc.
	Smarter scout	UK	Attempts to use AI to score player actions; promising but still developing; good for ideas.
	Stats Score		
Physical Data & Game Intelligence	Skill Corner	France	Top-tier physical & tactical data; Game IQ; developed with Crystal Palace's staff; premium pricing.
	Catapult Sports	Australia	Specialist in GPS wearables; training load and physical readiness; very common in pro clubs. Now also Scouting workflow.
	TRACAB	Sweden	Stadium and broadcast-level tracking for physical match data.
Regional / Emerging & Scouting-Specific	Eye Ball	Africa-focused	Hard-to-source video content for African leagues and tournaments.
	Delphlyx	UK	Custom monthly player reports with physical and technical data; useful for African prospects.
	GolStats	Mexico	Practical for local Mexican leagues and talented domestic players; affordable; useful for clubs with limited scouting budgets.
Admin & Transfer Tools	TransferRoom	Global	Network for direct club-to-club & agent contact; real-time availability alerts; transparent deals.
	Libro de Pases	Latin America	Player registration and transfer record tool; keeps local clubs informed; practical for lower divisions. Now Scouting Reports but general.
Recruitment Hub	Pelly	UK	Former Brighton Scout is building an interactive Hub for Scouting.

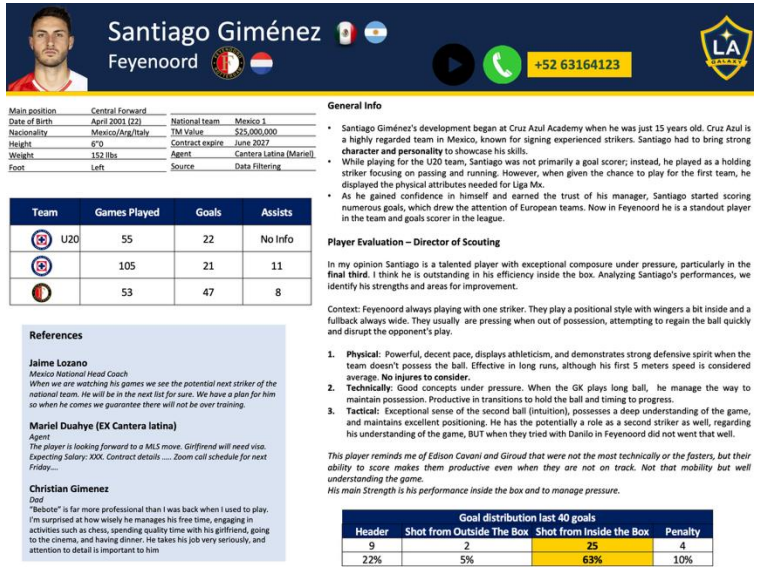
Player Report

Platform templates: Tools like Wyscout and Driblab offer editable templates that you can store in the cloud, share with the scouting group, and filter by position or scout. The advantage is that everything is centralized, and you can download PDFs anytime. The tradeoff is a monthly fee and staying tied to the platform.

Own templates: Some clubs create their own reports, using simple formats in PowerPoint (e.g., Santiago Giménez or Pukki examples) or regularly updating an internal database in Excel.

Tournament reports: Sometimes the goal is not to follow a single player, but to cover an international tournament, assess the level, and identify potential targets for the future.

New platforms: To save time, scouts sometimes record voice notes or complete short questionnaires first. Only top-priority players (AAA) then get a full written report. Also AI is heling the market to innovate, Peak AI in my opinion is the most interesting at this point.



Santiago Giménez

Jaime Lozano
Mexico National Head Coach
When we are watching his games we see the potential next striker of the national team. He will be in the next list for sure. We have a plan for him so when he comes we guarantee there will not be over training.

Mariel Duahye (EX Cantera latina)
Agent
The player is looking forward to a MLS move. Girlfirend will need visa. Expecting Salary: XXX. Contract details ..... Zoom call schedule for next Friday....

Christian Gimenez
Dad
"Bebote" is far more professional than I was back when I used to play. I'm surprised at how wisely he manages his free time, engaging in activities such as chess, spending quality time with his girlfriend, going to the cinema, and having dinner. He takes his job very seriously, and attention to detail is important to him

General Info

- Santiago Giménez's development began at Cruz Azul Academy when he was just 15 years old. Cruz Azul is a highly regarded team in Mexico, known for signing experienced strikers. Santiago had to bring strong **character and personality** to showcase his skills.
- While playing for the U20 team, Santiago was not primarily a goal scorer; instead, he played as a holding striker focusing on passing and running. However, when given the chance to play for the first team, he displayed the physical attributes needed for Liga Mx.
- As he gained confidence in himself and earned the trust of his manager, Santiago started scoring numerous goals, which drew the attention of European teams. Now in Feyenoord he is a standout player in the team and goals scorer in the league.

Player Evaluation – Director of Scouting

In my opinion Santiago is a talented player with exceptional composure under pressure, particularly in the **final third**. I think he is outstanding in his efficiency inside the box. Analyzing Santiago's performances, we identify his strengths and areas for improvement.

Context: Feyenoord always playing with one striker. They play a positional style with wingers a bit inside and a fullback always wide. They usually are pressing when out of possession, attempting to regain the ball quickly and disrupt the opponent's play.

1. **Physical**: Powerful, decent pace, displays athleticism, and demonstrates strong defensive spirit when the team doesn't possess the ball. Effective in long runs, although his first 5 meters speed is considered average. **No injures to consider.**
2. **Technically**: Good concepts under pressure. When the GK plays long ball, he manage the way to maintain possession. Productive in transitions to hold the ball and timing to progress.
3. **Tactical**: Exceptional sense of the second ball (intuition), possesses a deep understanding of the game, and maintains excellent positioning. He has the potentially a role as a second striker as well, regarding his understanding of the game, BUT when they tried with Danilo in Feyenoord did not went that well.

This player reminds me of Edison Cavani and Giroud that were not the most technically or the fasters, but their ability to score makes them productive even when they are not on track. Not that mobility but well understanding the game.
His main Strength is his performance inside the box and to manage pressure.

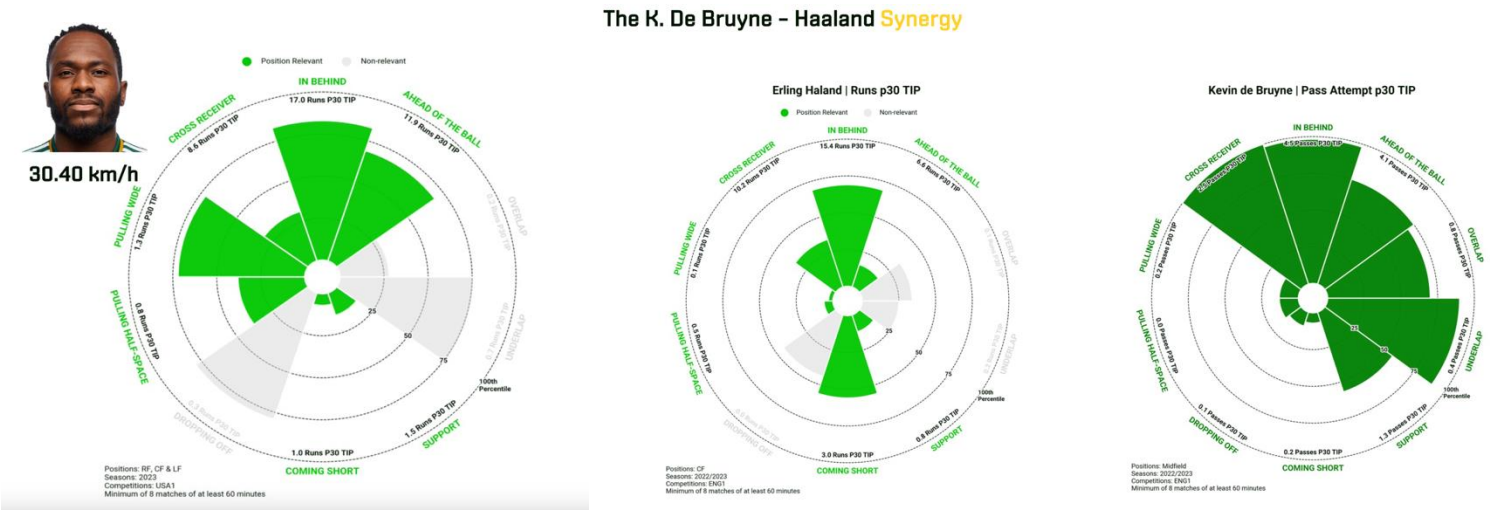
Game Intelligence

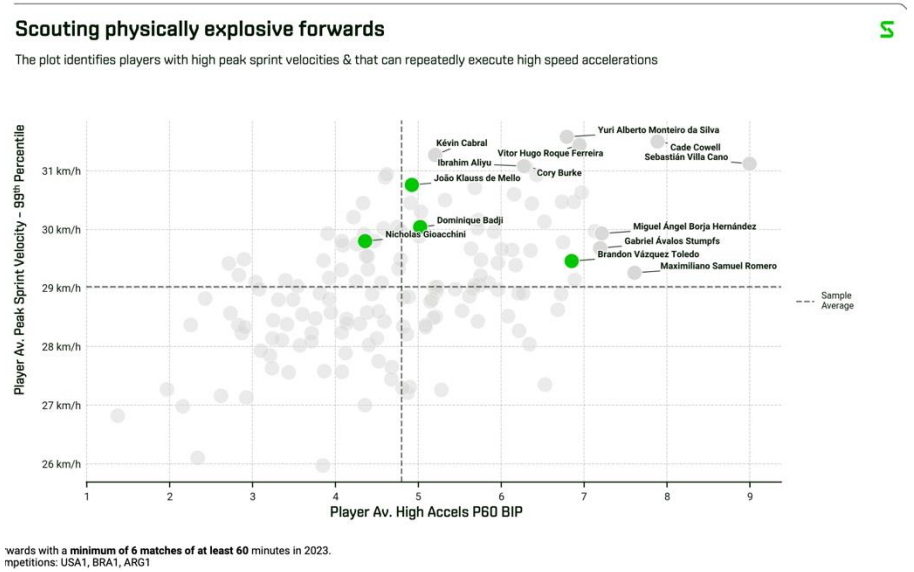
Skill Corner today is the most advance company in terms of data Analysis, they have 3 products:

1. Tracking Data: Raw tracking data enables the creation of bespoke performance models or further integration with your existing workflow.
2. Physical Data: Standard metrics by possession and period. All types of metrics like Sprinting Distance, High Intensity (HI) Count HSR.
3. Game intelligence: They categorize **Runs** (Dropping off, Coming Short, Pulling Wide, Support Runs), **passing execution** (Opportunities, Threat generated through passing to runs) and **Resisting Pressure** (% of high pressure received, Ball retention per pressure type).

Player Report QI Examples



Physical Data Comparison Examples

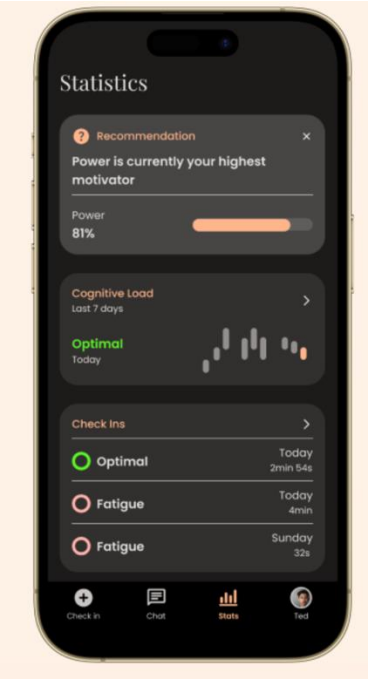


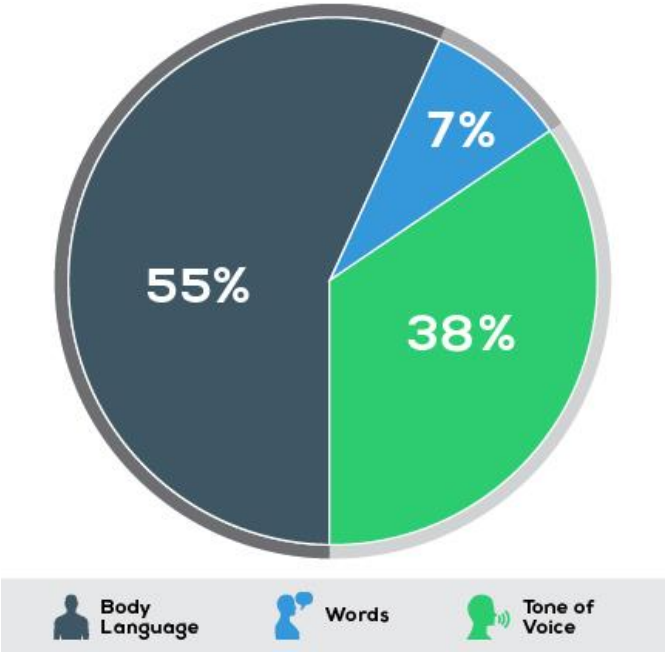
Social & Family

It's important to know everything about the player and his environment — who can **handle pressure**, whether his family is a support system or a heavy weight on his back, where he comes from, his traditions, religion, etc. Its also a must to assess how he might adapt to the new environment.

References are huge here, as they can reveal red flags before the signing. Some clubs even involve their psychology department to better understand a player's behavior under pressure — looking at body language, facial expressions, leadership, confidence, and more.

It's crucial to know how he reacts in **difficult scenarios**, when he needs to overperform, or when facing trouble.





Peak AI Platform has just started conversation with football clubes to connect players interviews with their AI cognitive tool. This is an emergent project, still raw.

Financial evaluation

- Is the player to keep, sell, loan, or develop long-term?
- What is the expected ROI?
- What salary is the agent requesting? (often shared via WhatsApp)
- What is the expected transfer fee and bonus structure?
- Signing fee requested by the agent.
- Tools like Transfer Room help — agents can send notifications when players have a set buy-out price.

#	Name	Age	Club	Name of Agent	Contact Details of Agent	X Transfer Fee	Current Salary USD	Contract Expiry	Release Clause	Comments
1	Kaua Prates	16	Cruzeiro	Fernando Araujo Trust Fotball Agency	Alexander Mattos – GM - +55 11 99472-6038					GM of Cruzeiro tolfd me they wont look to sell on summer, they have huge expectations.
2	Luis Benedetti	18	Palmeiras	Filipo Bertolucci	+55 11 97161-5355	Guilherme explained that because the player is left-footed, he believes the club will sell him pricier than V. Reis.	$720,000	2028	$60M	Head Scout Guilherme Dias +55 11 98383-5570 Abel Ferreira consider him a lot (training)
3	Rayan Vitor	18	Vasco	Nene Zini Sao paulo	Same as Firminho Daniel Azevedo Fomer Flamengo scout, now Chief Scout +55 21 96478-9180	$15M		December 2025, about to sign a new one proposed last week.	$35M	**Marcelo Santana GM** confirmed : MLS offer 6M USD Spain 8.5M USD Portugal 10M USD
4	Riquelme Felipe	17	Fluminense	Link Agency - Kaua Elias and Dudu, Prior Gabriel (Arsenal)	André Curry +55 11 98130-5454 Decio Berman +55 11 99205-5000	$18-20 M	$500,000 (New salary)	December 2026, will renew now.	$50M	Gabriel Oliveira – Performance Analyst +55 21 99775-7164
5	Wesley Nata	16	Fluminense	Lifepro	Rodrigo Cantieri - +34626117091					
6	Iago Teodoro Silva	19	Flamengo	Velop 4 Agency	Carlos Noval Academy +55 21 99981-5770 Alexandre +44 7908 800 625 alexandre@velop4.com			December 2026	$40M	Leader in the pitch. Captain in the academy. Southampton interested.
7	Juan Martin Rodriguez	19	Peñarol	They split the player rights, Juan Delgado and Nico Perchman	Juan Delgado (Boston River owner) +598 99 799 798 delgadogurmando@hotmail.com	$6M before Winter.				Peñarol final decision, but Boston owns a % DEPENDING OF THE TF
8	Gonzalo Escudero	17	Racing	Guillermo Carral	+54 9 3446 41-9053 Best friend of Carral Pedro Balladares		$70,000		$22M	Salary and RClause is new. One German club behind.
9	Franco Mastantuono	17	River Plate	Federico Vitale					$45M	They will ask 10,15M less than the Release Clause
10	Valentino Acuna	19	Newells	Pablo Sabbag Before Memo Aliprandi	Sabbag +54 9 11 4419 6070			December 2026, in 2024 he sign the renewal		I know him from Guido Rodriguez operations. My friends of Montreal told me Bologna is behind.
11	Neyser Villarreal	19	Millonarios	Andres Romano present, previously Sebatian Pusch,	Juan Jose Chalela - Sporting Director Millonarios +57 316 5251267	$5M, Player wants to leave free, is not willing to renew. Millonarios suggest Sebastian Mosquera 2006 (Winger)	$240,000	November 2024		I recommend to deal with Daniel Azcarrate. Brazilian club has an offer of $4M (Vasco), player don't want brasil.
12	Nimfasha Berchimas	16	Charlotte FC	Agent Lyle Yorks	GM in Charlotte is Zoran Krneta - +1 (704) 819-6521 Agent Lyle Yorks – T. Adams agent		$100,000	December 2025 with option 2026		In my opinion I consider Oskar Olsen (Pro Spors Agency) a great intermediant for this kind of operations.
13	Peyton Miller	17	New England	Octagon agency Mike Senkowski	Remi Roy Sporting D +1 (508) 958-3070 Agent number: +1 (703) 597-7586		$80,000
